CURRICULUM AND QUALITY COMMITTEE REPORT

Subject: College Performance indicators 2017/18	**Purpose:** **For Approval** ☐ **For Discussion** ☒ **For Information** ☐
Prepared by: J Robertson	**Date:** 15/2/19

Purpose: To inform the Committee on the College's performance overall and against sector benchmarks for 2017/18

Linked to Strategic Goal 2: Deliver successful outcomes for all our learners.

The SFC provides individual Colleges with a version of their performance indicators to be published on that College's website on a specified date, and in line with this we published Borders College Student Success Performance Indicators 2017-18 on our website 29/1/19:
http://www.borderscollege.ac.uk/college-documents/quality-documents/

Copies of this report, with additional commentary, are included within the Committee papers, and this version, once formatted for publication, will replace the version above on the website.

The national report was also published 29/1/19 on the SFC website at:
http://www.sfc.ac.uk/publications-statistics/reports-publications/reports-publications.aspx

The report highlights that FE and HE full time successful completion is above the sector average. Whilst success rates for over 18s are higher than the sector average, those for under 18s remain lower. The achievement rate for students with a disability is higher than the sector average, however the rates for students in the most deprived postcodes remain below average, albeit these are based on a very small number of areas. The rate for care experienced learners is lower than sector average and last year's rate; however the data on which this year is based was reviewed and the figures are more robust.

Also included in the papers, for internal reference only (the SFC does not permit publication by one College of another College's information), are tables produced from SFC data that indicate some high level comparisons of Borders College performance against other Colleges in the sector.

Recommendation:
The Committee notes the contents of the reports.

Previous Committee Approvals:
